a
Vision: toy position
probe R² (adult-quality test input)
checkpoint (months)
information ceiling
Immature input
Immature + growth
Growth only
Adult input
Shuffled quality
Reversed
b
Vision, probed at its own age
probe R² (own-age input)
checkpoint (months)
c
Hearing: toy position
probe R² (adult-quality test input)
checkpoint (months)
d
Learning lags what the input allows
fraction of ceiling reached
checkpoint (months)
Vision, immature
Vision, adult
Hearing, immature
Hearing, adult
e
Body senses start near mature
body sense: hand position R²
touch: toy identity accuracy
chance (touch)
checkpoint (months)
f
Half-ceiling age (Kendall τ = 0.00)
age at half of 12-mo ceiling (months)
infant order: touch < hearing < vision
(set by the front-end tables)
